Goal

As an IT Infrastructure Manager, my goal is to continue driving the evolution of our IT infrastructure to support the growing needs of the organization. I aim to leverage my expertise in network design, server management, virtualization, and cloud technologies to ensure high availability, scalability, and security for all critical business systems. In the coming year, I plan to enhance our disaster recovery capabilities, fully integrate containerization solutions like Kubernetes, and streamline automation processes to increase efficiency. Additionally, I am committed to expanding my knowledge in DevOps and Cloud Services to better align with modern development practices. I will also continue to lead a talented team of IT professionals, fostering collaboration and growth to ensure we're always ready for the next challenge. Furthermore, I plan to strengthen our cybersecurity practices by staying ahead of emerging threats and maintaining robust defenses across all networks and systems.

Work Experience

06/2011 – PRESENT TEHRAN, IRAN

IT Infrastructure Manager
Modiran Vehicle Manufacturing Company (MVM)

01/2016 – PRESENT TEHRAN, IRAN

Information Technology Consultant
Toyouran Abzar Industries

01/2014 – 01/2015 TEHRAN, IRAN

Information Technology Consultant
Information Technology Consultant
Film Negar Magazine

01/2010 – 01/2011 TEHRAN, IRAN

IT Manager
Valiasr Technical College

01/2007 – 01/2010 TEHRAN, IRAN

network Administrator
Fanamoj

Education

01/2013 – 01/2015 TEHRAN, IRAN

Information Technology/Security |
Bachelor's
University of Applied Science and Technology

Intelligence

Key Projects

01/2014 – PRESENT TEHRAN & BAM, IRAN

Enterprise Network Security Overhaul – Modiran Khodro

- Replaced legacy systems with a complete security suite including NGFW, WAF, DAM, and traffic monitoring.
- Established regular security audits and maintenance routines for continued compliance.

TEHRAN & BAM, IRAN

Enterprise Network Infrastructure Deployment – Modiran Khodro

- Rolled out a fully redundant network infrastructure covering multiple offices and the main factory.
- Deployed high-performance fiber, copper, and wireless networks, improving connectivity and uptime.

TEHRAN & BAM, IRAN

Server and Services Migration – Modiran Khodro (2015–2016)

- Migrated mission-critical systems to a new facility with near-zero Down-time.
- Coordinated wireless bridging and data replication using Veeam to ensure seamless transition.

TEHRAN & BAM, IRAN

Virtualization & Server Hardware Upgrade – Modiran Khodro

- Transitioned infrastructure from physical to virtual platforms, cutting server footprint by over 60%.
- Integrated G7 to G8 and finally to G10+ hardware, enabling scalable growth and centralized management.

TEHRAN & BAM, IRAN

Unified Active Directory Deployment – Modiran Khodro

- Centralized authentication across all business units, improving access control and user management.
- Enabled single sign-on (SSO) for internal and cloud platforms including Exchange and VPN.

TEHRAN & BAM, IRAN

Kubernetes Implementation – Modiran Khodro

- Worked with DevOps to provision Kubernetes environments across dev, staging, and production.
- Delivered high availability infrastructure, supporting CI/CD pipelines and microservice architecture.
